

For best results, locate a suitable site for your fountain that is leveled and provides pleasing viewing angles.  
Note: Always follow local electrical codes and use a 110V GFCI protected outlet.

## 5668F

1. Locate a suitable site for your fountain. Site should be level and provide a pleasing viewing angle. You should always follow local electrical codes and use a GFCI protected outlet.
2. Locate the 6668 bowl in the center of your site. Bowl must be on firm leveled surface.
3. Feed cord through opening inside the bowl and place Rubber Stopper around pump cord, as illustrated (Fig A & B). Press Rubber Stopper firmly into place (Fig. C), creating a watertight seal.
4. Place submersible pump in bottom of bowl, facing the pump's intake towards the lowest point.
5. Connect Tubbing to pump and slip in the Restrictor
6. Place 5668 Spiral Top on top of 6668 Bowl. Lean it towards one side to connect tubing.
7. Fill 6668 bowl with water.
8. Plug pump into GFCI protected outlet.
9. Adjust R1 as necessary to control flow.
10. Decorate with rocks or pebbles (not included) to complete the effect.

### IMPORTANT - WINTER CARE:

Do not allow water to collect and freeze in fountain bowl(s) or shell(s). Do not allow fountain pieces to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure: first, remove the statue(s) and pump, storing them inside if possible. Next, locate the drain plug on the underside of bowl(s) or shell(s). Remove the drain plug to drain any water "trapped" between the walls of the bowl(s) or shell(s). Then fill the bowl(s) or shell(s) with an absorbent material, such as burlap, blankets, etc. Finally, cover the entire fountain with a Henri Fountain Cover. Should condensation droplets form on the inside of the cover, the material will absorb them.

By following these simple and sensible precautions during the winter season, you will protect your fountain for years of beauty and enjoyment!

**CAUTION:** The use of Chlorine or Chlorine Bleach may damage the finish of your fountain. When cleaning your fountain, it is best to test the cleaning agent on an underside or back surface to determine the agent's suitability. We recommend the use of a mild, non-abrasive treatment, such as Henri Lime Remover and Preventer. To avoid foaming, thoroughly rinse the fountain to remove the entire cleaning agent.
